URBAN OPEN SPACES: small and interconnected. Keywords to address future urban challenges?

The scientific event aims to discuss the most effective strategies for open spaces to play an increasingly strategic role in the continuing challenges our cities are undergoing.

Mending fragmentation, maintaining natural resources, reducing the heat island effect, and maximizing existing environmental quality requires a new model of open space capable of providing diversified responses for the community, with high functional flexibility, usable in different times/ways which allows experimenting “life between buildings”.

What strategic points should an Urban Open Spaces Design Manifesto contain?

Keywords such as connection, integration, and multiplicity... can they provide emerging design perspectives?

SS

Institutional Greetings

ORNELLA ZERLENGA
Director of the Architecture and Industrial Design Department

EFISIO PITZALIS
Coordinator of the PhD Course in Architecture and Cultural Heritage

Opening Conference

FRANCESCA MUZZILLO
Open spaces design: foundation and perspectives
Department of Humanities and Cultural Heritage (DiLBEC) - University of Campania “Luigi Vanvitelli”

CATERINA FRETTOLOSO
Open spaces design: making urban connections
Department of Architecture and Industrial Design (DADI) - University of Campania “Luigi Vanvitelli”

Guest Speakers

LISA HINDERDAEL
Co-Founder of HagenHinderdael
Scaling Sustainably: Interconnected Interventions

HOLGER KEHNE
PhD, Founding partner Plasma Studio
Inflections- across spatial, formal, and conceptual registers

Round Table

ROSSELLA FRANCHINO (moderator)
Antonio Bosco
Monica Cannaviello
Gianluca Cioffi
Caterina Frettoloso
Francesca Muzzillo
Sergio Rinaldi
Antonella Violano
Professors at the University of Campania “Luigi Vanvitelli”

International Lectures curators:
Caterina Frettoloso and Francesca Muzzillo
